1. Because test flights conducted with the 4 BMW-003 jet engine produced in Yugoslavia and mounted on a Heinkel HE-162 frame were unsuccessful, new experiments are currently being conducted with former German aircraft of the Arado type from which the Jumo-004 engine has been removed and replaced by the 4 BMW-004 engine.
2. The experiments are being carried out at Ecka airfield. Major Zoran Zimanovic, who was recently in the Soviet Union, is the test pilot.
